

Chemetron Medical Gas Outlet Repair Kit

The solution to your medical gas outlet maintenance needs is in this kit.

Your medical gas outlets must perform when you need them. That means maintaining them regularly. With the Chemetron® Medical Gas Outlet Repair Kit, your maintenance staff is equipped with the necessary repair parts to provide any needed outlet service. Quickly. Efficiently.

Most quick-connect medical gas outlets use an O-ring to seal around the adapter for a gas-tight connection. Occasionally that O-ring may need replacement. Chemetron offers a case for quick repair.

Supporting our case is the unique Chemetron O-ring service tool. It is the only tool of its kind in the industry that permits easy replacement of quick-connect outlet station O-rings – without disassembly of the outlet,

without interrupting adjacent outlets, without shutting off the gas supply.

In the Chemetron Medical Gas Outlet Repair Kit, you will find a common parts kit with O-rings for all Chemetron outlet stations and components for 348, 378 and 400 series, quick-connect, and DISS outlets. Also contained in the complete repair kit is the innovative O-ring service tool and parts kit for quick-connect, DISS and high-pressure nitrogen outlet stations.

If you do not require all of these parts kits, ask about our starter kit.

The evidence is clear. There is no other medical gas outlet repair kit like this. Anywhere.

Let Chemetron solve your maintenance needs. Contact us today for more information or a demonstration.

Chemetron Medical Gas Outlet Repair Kit

Starter Repair Kit allows you to tailor the repair kit to your needs and budget. It is recommended that the starter kit be purchased for basic repair of outlet stations except high-pressure nitrogen. For complete repair of an outlet by specific type and model (quick-connect, DISS, and/or high-pressure nitrogen), order the respective parts kits as well. Space is provided in the starter kit carrying case for addition of the parts kits.

Complete Repair Kit gives you all of the repair kits under one catalog number for convenience in ordering.
